

# Task 1 Report

## Professional Personal Portfolio Website

---

|              |                                      |
|--------------|--------------------------------------|
| Intern       | Ghulam Mohiyu Ud Din                 |
| Email        | ghulammohiyudin11@gmail.com          |
| GitHub       | github.com/GMD369                    |
| LinkedIn     | linkedin.com/in/ghulam-mohiyu-ud-din |
| Technologies | HTML5, CSS3, Vanilla JavaScript      |
| Status       | <b>Completed</b>                     |
| Date         | July 2026                            |

## 1. Objective

---

Design and develop a modern, fully responsive personal portfolio website that showcases the intern's profile, technical skills, projects, education, and contact information, built using only HTML5 and CSS3 (with vanilla JavaScript for interactivity) — no CSS frameworks (e.g. Bootstrap) or third-party templates.

## 2. Deliverables Overview

---

| Requirement              | Status | Notes                                                       |
|--------------------------|--------|-------------------------------------------------------------|
| Home Page                | Done   | Hero section, highlight cards, CTA band                     |
| About Page               | Done   | Bio, profile photo, info grid, stats, experience timeline   |
| Skills Page              | Done   | 6 skill cards with animated progress bars + tool chips      |
| Education Page           | Done   | Education timeline + key coursework cards                   |
| Projects Page            | Done   | 12 real project cards with filtering by category            |
| Contact Page             | Done   | Contact info card + UI-only contact form                    |
| Responsive Design        | Done   | Breakpoints at 960px, 720px, 480px                          |
| Navigation Bar           | Done   | Sticky navbar with mobile hamburger menu                    |
| Hero Section             | Done   | Animated avatar, intro copy, CTA buttons                    |
| Skills Cards             | Done   | Progress bars animate on scroll into view                   |
| Project Cards            | Done   | Image thumbnails, tags, filterable, hover zoom              |
| Contact Form (UI only)   | Done   | No backend; shows confirmation state on submit              |
| Footer                   | Done   | Site-wide, consistent across all pages                      |
| Smooth Scrolling         | Done   | CSS scroll-behavior: smooth                                 |
| Hover Animations         | Done   | Cards, buttons, nav links, social icons, project thumbnails |
| Professional Color Theme | Done   | Indigo/teal palette via CSS custom properties               |

|                         |             |                                                       |
|-------------------------|-------------|-------------------------------------------------------|
| <b>Bonus:</b> Dark Mode | <b>Done</b> | CSS variable theme switch, persisted via localStorage |
|-------------------------|-------------|-------------------------------------------------------|

### 3. Site Structure

| File           | Purpose                                                                                           |
|----------------|---------------------------------------------------------------------------------------------------|
| index.html     | Home page                                                                                         |
| about.html     | About + Experience                                                                                |
| skills.html    | Skills & tools                                                                                    |
| education.html | Education & coursework                                                                            |
| projects.html  | Filterable project portfolio                                                                      |
| contact.html   | Contact info + form                                                                               |
| style.css      | Shared design system (variables, layout, responsive rules, dark mode)                             |
| script.js      | Theme toggle, mobile nav, scroll reveal, progress-bar animation, project filter, form UI feedback |
| images/        | Profile photo & project thumbnails                                                                |

### 4. Key Features Implemented

#### Navigation & Layout

- Sticky, blurred navbar with active-page indicator
- Hamburger menu for mobile with slide-down animation
- Consistent footer with quick links across all pages

#### Interactivity (Vanilla JS)

- Dark/light mode toggle, persisted via localStorage

#### Responsive Design

- Fluid grid layouts (CSS Grid + Flexbox)
- Breakpoints: 960px (tablet), 720px (mobile), 480px (small phones)
- Text wrapping fixes for long contact details on narrow screens
- 16px form inputs to prevent iOS auto-zoom

#### Content

- Scroll-triggered reveal animations (IntersectionObserver)
- Animated skill proficiency bars on scroll
- Project filter by category (AI & SaaS / Web Apps / Console)
- Contact form UI feedback on submit (no backend)
- Personalized with real resume data (education, experience, 12 projects)
- Google Fonts (Inter) for consistent modern typography
- Real GitHub & LinkedIn icon links (SVG, no external images)

## 5. Technologies & Tools

---

HTML5

CSS3 (Grid & Flexbox)

Vanilla JavaScript

CSS Custom Properties

IntersectionObserver API

localStorage

Google Fonts (Inter)

Inline SVG Icons

No CSS frameworks (e.g. Bootstrap) or pre-built templates were used, per task requirements — all layout, components, and animations were hand-written.

## 6. Conclusion

---

All required pages and features for Task 1 were implemented and verified in-browser across desktop, tablet, and mobile viewport sizes. The bonus dark mode feature was also completed. The site is fully static (HTML/CSS/JS only), requires no build step, and can be opened directly or hosted on any static file host (e.g. GitHub Pages, Netlify, Vercel).
